

[RFC5118](#), "Session Initiation Protocol (SIP) Torture Test Messages for Internet Protocol Version 6 (IPv6)", February 2008

The following 1 erratum has been reported for RFC5118. Note that the list may include both verified and unverified errata records.

Errata ID: 1311

Status: Verified
Type: Technical

Reported By: Alfred Hoenes
Date Reported: 2008-02-11
Verifier Name: Cullen Jennings
Date Verified: 2008-04-16

Section 4.3, 1st par says:

[...], the intended port
number becomes the last octet of the reference.

It should say:

[...], the intended port
number becomes the last octet pair of the reference.

Notes:

Each hexadecimal group in a literal IPv6 address encodes two octets
of the IPv6 address -- cf. RFC 4291 !
